Display

The Yamaha ATV displays are specially developed for showing every model of the YAMAHA LEISURE ATV line up. The ride plates are YAMAHA branded to enhance awareness and their sturdy design underline the YAMAHA ATV's image.

By selecting the angle of the display emphasis of a certain part of the ATV on display can be chosen. For example the 3D view of the ATV's bodywork can be emphasized. By tilting it in another direction the chassis and underbody can be put more in the picture.

FEATURES:

- The foot construction is black satin powder coated for durability and lesser presence.
- The Satin Polished aluminium surface of the ride plates are easy to maintain, so that the display will keep its bright appearance.
- The ride plates are demountable from the display foot, for easy transportation.
- The construction and surface treatment of the display makes it possible to use them both indoor as well as outdoors.

1 Kick Shaft Kit

Includes all internal components necessary to adapt a kick start lever.

'04-'06

GYT-5TG07-20-00

2 Kick Crank Kit

Kick start lever is made of 2024-T3 billet aluminum, and attaches to a stock YZ450F kick boss which is supplied in the kit. This lever has been precisely designed to give you the leverage needed to start the motor yet also gives you enough clearance for your foot.

'04-'06

GYT-5TG07-35-00

3 Plastic Footwell Extensions (set)

Made from high impact plastic. Designed to attach to the Aluminum footwells (GYT-5TG57-30-00) only.

'04-'06

GYT-5TG57-50-BK

4 Starter Block Off Plug

Required if the started motor is removed.

Uses stock starter O-ring.

'04-'06

GYT-5TG07-50-00

5 Hot Start Cable

This cable kit enables you to add a handlebar mounted hot start lever to your ATV. This function can be necessary to start your motor with the kick start lever. Requires one of GYT-5TG39-00-00

'04-'06

GYT-5TG38-20-00

6 Hot Start Lever

Used by the Yamaha Factory Team. Replaces the stock hot start lever and relocates it from finger to left thumb. Allows for easier clutch and hot start lever operation while starting in gear. Designed to work with the stock light switch cluster installed.

(Requires Hot Start Cable GYT-5TG39-00-00)

'04-'06

GYT-5TG39-00-00

● Foot Wells Kick Start

(NOT SHOWN)

Includes a pair of aluminum footwells. The right side has been designed to give you clearance for your foot when the kick start lever is installed. The rear fender must be cut to mount the footwells and to allow access for the kick start lever.

6 GYT-R Carburettor Jet kit

Designed to improve throttle response, drivability, and power when the accessory air filter is used on the stock engine. Tunable for the GYT-R™ Muffler. GYT-5YT98-00-00

7 GYT-R Aluminum Muffler

Passes the 96 dBA 20" stationary test used by authorities in some public riding areas. Provides over 25% increase in mid range horsepower and a 2 peak horsepower gain.

FEATURES INCLUDE:

- Ball-burnished aluminium shell with stainless steel inlet pipe.
- Ball-burnished 6061-T6 aluminium end caps
- Silent Sport™ Pillow packing.
- Removable screen-type U.S.F.S.-approved spark arrestor.
- Completely rebuildable.

*This accessory may be restricted to closed-course use. GYT-5YT93-01-AL

8 GYT-R Air Filter Adaptor

Adaptor allows use of the high flow air filter in the stock airbox. GYT-5YT95-10-00

9 GYT-R High Flow Air Filter

High flow gauze filter offers superior engine protection, reusable. Must use billet air filter adaptor plate (GYT-5YT95-10-00). GYT-5YT95-01-00

6 Billet Clutch Inner Hub

GYT-R Clutch Components are precision machined of aerospace-quality aluminum alloys with unique hard coating. That provides superior performance and clutch feel, as well as excellent component durability. The patent-pending "auto oiling system" forces oil through specially cut holes in the pressure plate, into the inner hub, and then to the clutch plates. This results improved clutch performance, with lower clutch temperatures, less clutch expansion, and extended clutch life.

GYT-1S356-40-00

7 Clutch Basket

Precision machined from the highest grade of aluminum and then hard anodized to achieve an exceptionally hard, wear-resistant surface. This clutch basket provides amazing durability that has been thoroughly tested and race-proven.

GYT-1S356-10-00

8 Clutch Pressure Plate

Precision machined from the highest grade of aluminum and then hard anodized to achieve an exceptionally hard, wear-resistant surface. Additional oil passages help improve clutch performance as well as reducing weight by 30% to reduce rotational mass for improved acceleration. This clutch pressure plate also provides amazing durability that has been thoroughly tested and race-proven.

Genuine Parts

Chain Kits

Genuine Chain Kits

Yamaha Genuine Chain Kits are composed of the same parts which were selected for the assembly of your machine. So with the purchase of a Genuine Chain Kit you assure yourself of perfect quality for a sensible price which suits your machine seamlessly.

Maintenance

Especially in muddy terrain, chains and sprockets tend to wear more rapidly. To lengthen the life of your chain and sprockets, regularly check that your chain is tight enough, but not too tight. If the chain is too tight, your transmission will wear more quickly. Too much slack on the chain will decrease its life. After using your machine, lubricate your chain regularly.

Warning: *do not clean your chain with solvents or high-pressure jet wash.*

Worn chains or sprockets?

When either your chain or one of the sprockets is worn, Yamaha recommends that you change both sprockets and the chain together. Replacing only the worn part will shorten the life of the new part as the other two components are likely to have worn as well. Both your safety and convenience are best served with Yamaha Genuine Chain Kits.

'Yamaha strongly recommends that you rely on the expertise and facilities of your authorised Yamaha Dealer for servicing your machine'

Genuine Brake Pads & Brake Shoes

Yamaha Genuine Brake Pads & Brake Shoes have been tested and approved specifically for your machine. Because of the model specific combination of Brake Pads and Brake Discs, Genuine parts last longer and assure ultimate braking performance. The same philosophy applies to Genuine Brake Shoes and Drums and equal results are accomplished.

Maintenance

Especially after riding your machine in muddy and dusty terrain, maintenance of your brake system

will increase the life of the component parts considerably.

- regularly check the level of your brake fluid, refill when necessary and replace every 2 years.
- check brake hoses for cracks or leakage. Replace them when necessary and at least every 4 years.
- check for wear of your brake discs and pads regularly, replace them when they have gone thin
- wash brake calipers and discs with clear water only.

Braking systems are critical to your safety. Don't be careless. Have your machine serviced regularly by your authorized Yamaha dealer.

Genuine Air & Oil Filters

The Air & Oil Filters Yamaha selected have been chosen to optimize engine performance at maximum efficiency. They were chosen specifically for the engine in your machine. Both filters are essential elements of that power source. Maintain them well and replace them when required to keep the engine running smoothly for a long time.

MAINTENANCE

Your owner's manual states clearly when to replace your filters. If such a manual is not available to you,

your dealer will be able to judge whether you have to replace them or not. A dirty air filter will result in higher fuel consumption. A dirty oil filter will decrease the engine life.

NOTE:

Replacing air and oil filters may require specific knowledge and tools. We recommend you leave this specialist job for your dealer to take care of.

Genuine Parts

Batteries

BATTERIES

For Batteries used in ATVs Yamaha works closely together with YUASA and GS, two leading companies in the battery industry. We recommend these top quality batteries because they suit the quality of your machine.

MAINTENANCE

Depending on the type of battery that you use (Conventional, Maintenance Free or Sealed) your battery may need an occasional refill of distilled water to increase the electrolyte level. Make sure that breather tubes are positioned correctly and show no signs of punctures. Other batteries may need an initial charge right after purchasing before you can use them. Normally the dealer will do that for you.

STORAGE

When you do not operate your machine for a longer period of time, remove the battery and recharge it. Don't expose it to extreme temperatures or bright sunlight to lengthen its life.

ENVIRONMENT

Yamaha and its dealer network care about the environment. We are conscious of the damaging effects sulfuric acids for instance may have on nature. Therefore your dealer has access to an organized network which will take care of the collection, sorting and disposal of your used batteries.

The Story of Yamalube

Our number one goal in creating Yamalube is to ensure that you are getting the finest oil available for your Yamaha. Of course, no one oil is perfect for every application. That's why Yamalube is available in the precise formula your Yamaha Engine needs. The Yamalube Story: When Yamaha started making engines the engineers followed the common practice of recommending "off-the-shelf" oils. Experience began showing that conventional oils didn't always offer the level of protection against wear and tear the customer paid for.

Unfortunately, that sometimes resulted in significantly shorter engine life and a loss in performance. It became clear that our customers needed and deserved an exceptional oil product.

The same engineering team began searching for lubricants that met Yamaha's high standards. They insisted on the finest ingredients in precise formulations that would give dependable protection and enable the engine to deliver the high performance it was designed to give. This search eventually led to the development of our own premium oils - Yamalube. What is Yamalube? Each Yamalube oil is made from base oils, additives, and solvents in combinations specific for the application.

For example, the additive package for Yamalube 2-M is outboard oil is very different from our Yamalube 2-R for motocross motorcycles, even though both are 2-stroke engines. These two engine types have different stress loads, with the outboard often operating for extended periods under heavy load while the motocross engine is subjected to frequent bursts of throttle under extreme conditions. Consequently, the oils developed for these engines have different lubrication formulas.

Yamalube Products

Yamalube FS 4

- Type: Fully Synthetic
- Oil name: 4 Stroke Motor Oil
- Specifications: API SG/ JASO MA

10W40 (12X1L)	YMD-65011-01-01
10W40 (4X5L)	YMD-65011-05-01
10W40 (1X60L)	YMD-65011-60-01
15W50 (12X1L)	YMD-65012-01-01

Yamalube S 4

- Type: Semi Synthetic
- Oil name: 4 Stroke Motor Oil
- Specifications: API SG/ JASO MA

10W40 (12X1L)	YMD-65021-01-01
10W40 (4X5L)	YMD-65021-05-01
10W40 (1X208L)	YMD-65021-20-81
10W40 (1X60L)	YMD-65021-60-01
20W50 (12X1L)	YMD-65022-01-01
20W50 (1X60L)	YMD-65022-60-01

Yamalube M 4

- Type: Mineral
- Oil name: 4 Stroke Motor Oil
- Specifications: API SG

10W40 (12X1L)	YMD-65031-01-01
10W40 (1X208L)	YMD-65031-20-81
10W40 (1X60L)	YMD-65031-60-01
20W50 (12X1L)	YMD-65032-01-01

Yamalube S 2

- Type: Semi Synthetic
- Oil name: 2 Stroke Motor Oil
- Specifications: 81 YMC 525

S2 (12X1L)	YMD-65042-01-00
